

General Fan Handings and Driving Arrangements Datasheet

FM 00701

HANDINGS - listed below are some of the most common fan handings used, although Halifax Fan can supply any handing on request. Handings are specified by rotation followed by angle (shown from drive side).

HANDING R0 OPPOSITE L0	HANDING R45 OPPOSITE L45	HANDING R90 OPPOSITE L90	HANDING R135 OPPOSITE L135	HANDING R180 OPPOSITE L180	HANDING R225 OPPOSITE L225	HANDING R270 OPPOSITE L270

DRIVING ARRANGEMENTS - shown below are the various popular driving arrangements available

Arrangement No.1	Arrangement No.1TM (Top Mounted motor)	Arrangement No.1/3
Arrangement No.2A	Arrangement No.2A/3	Arrangement No.3 (direct drive)

MOTOR POSITION - for space saving reasons a series of Baseframe motor position layouts are available for v belt driven fans. The four standard motor positions are shown below; other types of motor mounting (e.g. top or stool mounted, see above) are available on request from Halifax Fan.

Motor position A	Motor position B	Motor position C	Motor position D

Access Panel

Position -

To allow easy access to the impeller for cleaning and inspection, a variety of PANEL POSITIONS are available, these are specified by the angle from the horizontal (when viewed from the drive side).
